

Services Unmatched

ISO 9001:2000 Registered

“When you require immediate response to your needs, consider SpaceAge Synthetics, Inc.”

SpaceAge Synthetics guarantees quality products to ensure your good reputation and success. We take great pride in offering the types of services that are unmatched in our industry.

As SpaceAge celebrates 15 years of business, we recognize that great manufacturers not only produce a good product, we take care of our customers with exceptional service. Reliability is one of the most important services we provide, and we work hard to earn your trust. Maybe that's why many of our customers have been with us for over a decade.

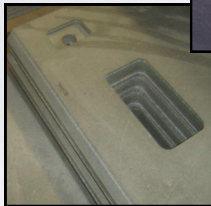

Some of the finest companies in the world use Thermo-Lite Board®.

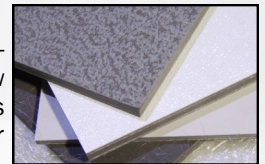

With a locally owned, employee stable manufacturing facility in Fargo, North Dakota, products are sold direct through sales representatives, and distributed through national partnerships, regional distributors and sales agents in the USA, Canada and Germany.

In addition to standard sheets, offered in a wide variety of thicknesses and dimension options; our Thermo-Lite Board® is cut into parts and kits to your engineer's drawings - custom drilling, milling and edging is available.

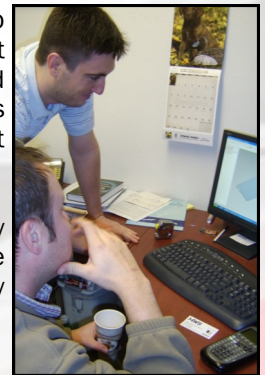

In house value-added manufacturing, and coating partnerships allow SpaceAge to offer various laminates and coatings applied to our products.

We are continuously testing innovative options.

Our Engineering Department has the capabilities to develop and analyze 2D and 3D solid models using current Computer-Aided Design technology like MasterCam, Pro/E and Finite Element Method (FEM) software. Full-scale testing is also available to validate material changes and component designs.

SpaceAge Synthetics recognizes that each company has very specific requirements to profitably build their products. We offer a range of services that will help your company achieve success.
